Benefits you get

Why does your project need Gart?

- ✓ Enhanced **system dependability and steadfastness**
- ✓ Greater operational **efficiency and effectiveness**
- ✓ **Improved teamwork** and seamless communication between development and operations teams
- ✓ Enhanced **customer satisfaction** and loyalty
- ✓ **Reduced costs and expenditures** through streamlining processes
- ✓ **Swift and nimble delivery** of software updates and features

How we work

DevOps development services

Let our DevOps transformation experts take care of your long-term infrastructure management strategy

From bringing your developers and IT personnel up to speed regarding modern DevOps best practices, to configuring continuous integration and continuous deployment pipelines, to deeply optimizing your cloud infrastructure — we've got what it takes to empower your developers with everything necessary for cost-effective, seamless software delivery

DevOps consulting services

Make the DevOps culture a part of your company's DNA

Leverage our expertise in software development and our advanced DevOps practices to dramatically change the ways you design, build, and deliver digital products

Our services

✓ **Cloud Computing**

- Cloud Migration Consulting
- Security and Cloud Compliance
- Cloud Migration Services
- Cloud Cost Optimization
- Azure Cloud Migration
- Database Migration
- AWS Cloud Migration
- Google Cloud Migration

✓ **Kubernetes**

- Cluster Management
- Container Management

✓ **DevOps Services**

- Blockchain DevOps
- DevOps Consulting
- CI/CD Services
- DevOps as a Service
- GCP Managed Services
- AWS Managed Services
- Azure Managed Services

✓ **Blockchain**

- Blockchain DevOps
- Blockchain Infrastructure
- CI/CD for Smart Contracts

✓ **SRE**

- Incidents Management
- Monitoring and Observability
- Infrastructure Reliability Service
- Backup and Disaster Recovery Services (DRaaS)
- Scaling & Performance Optimization
- Technical Support

✓ **Infrastructure Management**

- Cloud Infrastructure Management
- Infrastructure Support
- Managed Infrastructure

Benefits

Why do customers choose Gart Solutions?

We keep our focus on DevOps, Cloud and Infrastructure

01

We are your reliable partner when disaster recovery is needed

02

70% of our engineers are **senior-level certified professionals**

03

We know all the nuances of **operating large cloud migration projects to the cloud**

04

We are experts in technologies while **focusing on business challenges resolution** – let us know your project-specific requirements

05

We are focusing not only on the projects' challenges but also on **educating your team, consulting and advising**

Technologies we love

Cloud platforms

Google Cloud Platform
Digital Ocean
AWS
Azure
Hetzner

Infrastructure management

Azure ARM/Bicep
AWS Cloud formation
Terraform
AWS CDK
Pulumi

Databases

MySql
PostgreSQL
MongoDB
MS SQL
Redis

Security frameworks

ISO 27001
NIST
CIS

CI/CD

Jenkins
GitLab CI
GitHub Actions
Azure DevOps
TeamCity
Circle CI
Bitbucket

Analytics & Monitoring

Prometheus
Grafana
ELK
Fluentd
Graylog
NewRelic

Containers/orchestration

Docker/Docker Swarm
Hashicorp Nomad
Kubernetes
OpenShift
Rancher

Security tools

HashiCorp Vault
NeuVector
SonarQube

Azure Cost Optimization

Request

Optimize costs for Azure infrastructure.

Our solution

Reduced the major portion of the cloud expenditures that come from the Load Balancer and the network traffic.

Configured the file share with a private endpoint in the same VNet where AKS nodes were deployed so that all the traffic was routed only through VNet (internal traffic) and did not affect the Load Balancer costs.

TECHNOLOGIES USED

Azure

File Share (Azure Storage Account)

AKS (Kubernetes)

Load Balancer (LB)

Network costs were decreased by 90%, and up to \$400 per day was saved on the client's network and infrastructure costs.

In addition, the Gart team provided a set of recommendations on how to improve infrastructure in terms of performance, security, and reliability.

Optimizing Costs and Operations for a Cloud-Based SaaS E-Commerce Platform

Request

Modernize the functionality of the legacy SaaS e-commerce platform — improve its efficiency, user experience, optimize costs and move the SaaS platform from on-premises to cloud.

Our solution

Gart Solutions has helped customers make their SaaS platform more economically efficient by restructuring its architecture with the most up-to-date cloud development technologies.

We have also helped customer to avoid being tied to a single vendor by implementing various third-party integrations that raise platform's monitoring capabilities and improves product offering.

TECHNOLOGIES USED

Azure

Kubernetes

AWS

- **Optimized costs** by migrating the platform to the cloud
- **Added more flexibility** and avoided vendor lock-in
- **Improved platform efficiency** with CI/CD pipelines
- Enabled better **expense management**

Modern infrastructure for the Healthcare project

Request

Design and implement CI/CD and infrastructure for the development and production environment to create a common base of medical histories, receipts, and insurance information across all medical centres in the country.

Our solution

Used hardware from a local provider (GiGa Cloud) and created the infrastructure using VM Ware ESXi and Terraform. We configured connectivity between client production and the government-based E-Health platform and used the data-masking approach for Dev and Test environments to cover GDPR and HIPAA standards.

TECHNOLOGIES USED

Jenkins

Terraform

Docker

Kubernetes

VM-Ware ESX

- Automated the **infrastructure creation process**
- Provided functionality to **scale existing environments** and deploy a new one
- Created a **CI/CD solution**
- Adapted **built and deployment pipelines** according to development needs
- Improved the **delivery process** and made it self-managed

What our customers said

THE REVIEW

5.0 ★★★★★

"We were amazed by their ability to adapt to our evolving needs."

JUL 12, 2022

Quality:	5.0
Schedule:	5.0
Cost:	4.0
Willing to refer:	5.0

Feedback summary:

The gart team delivered excellent solutions that were used in the company's production process. They integrated quickly into the internal team, leading to a highly effective workflow. They collaborated and presented solutions impressively.

Development

THE REVIEW

5.0 ★★★★★

"The team was clear in communication and open to receiving feedback."

DEC 8, 2022

Quality:	5.0
Schedule:	5.0
Cost:	5.0
Willing to refer:	5.0

Feedback summary:

Gart completed migrating the applications, automating infrastructure provisioning, and setting up governance for the new infrastructure as scheduled. Their team was professional, receptive to feedback, and had excellent technical experience. They continued to support the client with Microsoft Azure.

Managed IT Services, Cloud Consulting

THE REVIEW

5.0 ★★★★★

"The team's task-focused deliveries, regardless of work-hour scope, were impressive."

AUG 3, 2022

Quality:	5.0
Schedule:	5.0
Cost:	5.0
Willing to refer:	5.0

Feedback summary:

Thanks to gart's efforts, they successfully processed the client's job duplication. The team communicated well and managed the workflow well. Their task-oriented delivery stood out in the partnership.
